SALES CONDUCTED BY MR. F. A. CHAPMAN AND MR. A. N. BADE

THE present sale closes the settlement of the estate of the late Reiza Khan Monif of Paris and New York. Specimens from other sources have been added. All objects belonging to the estate of the late Reiza Khan Monif are made distinctly recognizable, by a star added to the number.

While the whole collection is of an excellent average, some of the pieces are of outstanding merit. The large Rhages lustre platter is an unusually fine and important example.

Of the two important rugs, No. 364 is a fine representative of the classic 16th century Ispahan type. The graceful spacing of the design shows that it must be a rather early representative of the type, which can be assigned to the first half of the 16th century. The second rug, No. 365, belongs to the much discussed group of Eastern Caucasian and Persian rugs, from the extreme north-western border provinces, such as Ghilan. It shows a fine and virile design, with which we are also acquainted through the rugs of the Kuba type. Both pieces are equally important from the artistic and the historic standpoint.

IMPORTANT ORIENTAL RUGS

NUMBERS 364-365

*364 IMPORTANT ISPAHAN RUG PERSIA, 16TH CENTURY

The border shows a beautiful design of scrolls and peony flowers on deep bluish-green background. The centre field with a design of gracefully swinging spirals intermingled with leaves, peony flowers and Chinese cloud bands. Old-rose background. We assign this rug rather to the early 16th century, on account of the very fine spacing of the design. Rugs of the later period are inclined to seek improvement by technical elaboration and over-crowding of the design. A fluid and yet spacious composition like that of the present rug seems to indicate the short moment of balanced perfection that took place in rug designing during the period of Behzad. (Slight imperfections)

Size, 7 feet 8 inches x 16 *feet* 10 *inches*

[SEE ILLUSTRATION]

*365 IMPORTANT FLORAL RUG

EASTERN CAUCASUS, 17TH CENTURY

This type of design, which can be traced back to the 16th century Ispahan rugs, occurs in 17th century rugs which are ascribed to Armenia, Eastern Caucasus (Kuba) and the district Ghilan by the south-west corner of the Caspian Sea. It seems to be more and more probable that the Armenian rugs do not belong to Armenia proper, as stated by Martin, but to the Eastern Caucasus and the corresponding Persian border land. It is therefore more than possible that all the rugs of this design belong to the district of the Eastern Caucasus and the Persian border provinces.

The present rug is an extremely fine specimen of the type. It has a main border showing undulated vines with five petalled rosette flowers on red ground. The main border is flanked by two small flowers, showing small black geometrical rosettes on yellow ground. The centre field is on a beautiful sapphire-blue ground, with four rows of palmette flowers of bold design connected by tendrils, alternating with lozenge-shaped, scalloped motifs with small arabesque leaves attached at either end. (Slight imperfections) *Size, 5 feet 2 inches* x 13 *feet*
